

Outside Watering Change!!!!

Level 2 is now in effect

as of July 6, 2010

Chelmsford Water District

Summer Water Management Program

has changed to LEVEL 2:

6pm – 9pm ONLY

Odd number homes on odd number days

Even number homes on even number days

With the lack of rain and high demand on the water distribution system we have been forced to change the level of outside watering. To ensure adequate pressure and fire protection, storage tanks must be 3/4 full. Your efforts in conserving groundwater resources are critical for the success of this program! Full compliance is mandatory and all automatic sprinkler systems are required to have rain sensors and backflow devices and be set in compliance with our water management program hours.

Thank you for your cooperation.
